---

Fall is an excellent time for planting most rock plants and alpenes. Fall planting usually means a sturdier plant and more flowers the first season. We particularly urge the gardeners in the warmer states to plant in fall as our plants are usually frozen solid at the height of your spring season. Some of the rarer sorts are usually sold out early in spring. Order yours now for fall delivery and be sure to have them. Make your selections from our 1955 Price List and send them along with your dwarf bulb order. Our fall season extends from September 15th to November 15th.

Don't forget to order your copy of our new Handbook of Alpines and Rock Garden Plants. It gives complete descriptions and cultural directions of over 700 plant varieties. Paper cover edition, 50¢; Hard cover edition, \$1.00.

## HOLLAND GROWN BULB SPECIES

### FOR THE ROCK GARDEN, LOW BORDER AND FOR NATURALIZING

Our purpose in offering this list is to give you a fairly comprehensive selection of the best and rarest of the dwarf bulb species for the rock garden. All the bulbs listed are completely hardy and will give you an abundance of color and thorough satisfaction for many years to come. The prices of these top grade bulbs are extremely reasonable, therefore we urge you to order in quantity to get the fullest effect these little gems have to offer. We particularly recommend *Anemone blanda atrocoerulea*, *Corydalis solida*, *Iris danfordiae*, *Narcissus nanus*, *Tulipa linifolia* and the lovely *Puschkinia libonatica*.

**Please note:** Orders for Holland grown bulbs must reach us not later than August 1st, 1955, for delivery in October. We do not maintain a stock of these bulbs and must place our order with the growers in Holland not later than August 1st. Be sure your order is in our hands before that date. These bulbs are offered subject to their availability in Holland on August 1, 1955.

**Terms:** Remittance in full with your order. We cannot guarantee productiveness of any bulbs sold.
